

## **2.6- Student Performance and Learning Outcomes**

### **2.6.1- Program outcomes, program specific outcomes and course outcomes for all programs offered by the institution are stated and displayed in website of the institution.**

College has stated PO PSO and CO approved by the respective authorities. These PO PSO and CO are evaluated internally by the college at the end of every academic session and by external experts once in three years during the academic audit. The parameters broadly identified for evolution of PO, PSO and CO are result, placement, progression, success in competitive examination, participation in literary activities and entrepreneurship / self employment.

There actively parameters for evaluation are result analysis of theory subjects offer for evaluation of knowledge acquire result of practical courses and project implementation for evaluation of skill acquire.

The three points scales is adopted for the evaluation, if the passing percentage is more than 70% then evaluated as good PO, POS and CO achieved. If percentage is between 40 to 70 then PO, PSO and CO are average achieved and if result is less than 40% then PO, PSO and CO are poorly achieved.

Another parameter for evaluation of PO, PSO and CO is success in placement and progression. College has adopted two separate systems for evaluation of PO, PSO and CO for UG and PG programs. The PO, PSO and CO are evaluated as good achieve. If placement in UG program is greater than 10% and for PG program is greater than 50%. PO, PSO ad CO are average achieved if placement in 5% to 10% for UG program and between 20% to 50% for PG program. The PO, PSO and CO are poor achieved if placement is less than 5% for UG program and less than 20% for PG program.

Another parameter progression is also use for evaluation of PO, PSO and CO. The PO, PSO and CO are good achieved if the progression to higher education is greater than 50% for UG program and greater than 10% for PG program. The PO, PSO and CO are average achieved if progression to higher education is between 20% to 50 % for UG program and between 5% to 10% for PG program similarly the PO, PSO and CO are poor achieved if the progression is less than 20% for UG program and less than 5% for PG program considering the objective of professional program the PO, PSO and CO evaluation based on progression to higher education is not consider for PO, PSO and CO evaluation.

These above mention mechanisms for PO, PSO and CO evaluation are adopted in the meeting of joint BOS.
